

Radix VISO device management platform - built to get the job done!

VISO MDM is designed to manage single-purpose devices and let you stay on top of your device fleet, wherever your employees and customers are or whatever the use-case may be. Manage, maintain, configure, track and lock tablets, mPOS, rugged devices, smartphones, mobile scanning devices, information kiosks or consumer level device from a big-box store – through a single interface, making sure they are ready and optimized for their mission.

Main features

- Remote real-time screen control/view
- Screen sharing (one to many, many to one, 1:1)
- Policy enforcement with web and app filtering
- Kiosk modes for single/multipurpose usage
- Device tracking and locking
- Grouping and tagging
- Device-level usage history
- Fact-based decisions and reports
- Preconfigured workflows
- Triggers, geofencing and alerts
- Firmware management

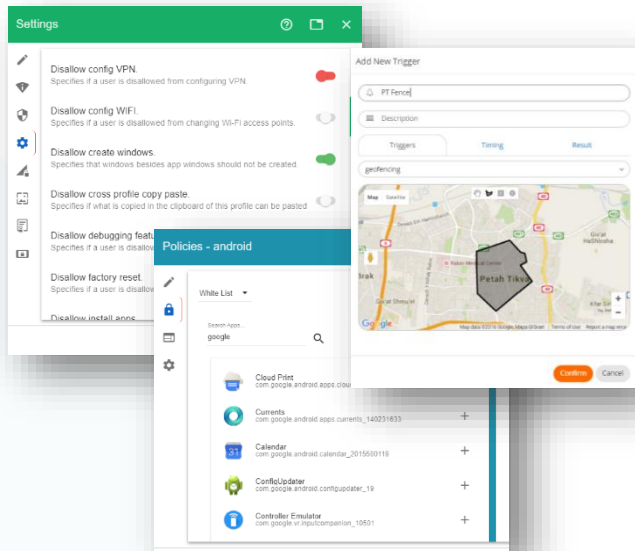

And much more!

Moonscape is a
Radix Authorized Solution Provider

Tailored for the task

Whatever your use-case may be, Radix **VISO** device management delivers a task-tailored interface that will suit your needs. Every device stakeholder receives the right tool for the job.

Device administration

- Device info: Model, IP, MAC, batt, OS etc.
- Asset info: S/N, ID, owner, group, tag etc.
- Limit usage of selected applications
- White/black list of applications
- Limit usage of internet and cellular data
- White/black list of websites and networks
- Tweak the look and feel of the device
- Track device location and store its history
- Analyze usage patterns and insights
- Set power management schemes

Harnessing the power of our unique and intuitive tool set, along with the device OS capabilities, makes Radix **VISO** one of the most comprehensive, easy-to-use and robust device management solutions. **VISO** comes equipped with a powerful backend platform, lightning-fast communication layer and native integration with your device and with 3rd party technologies.

Firmware integration

- Integrate the MDM agent in your device firmware (factory preloaded)
- Zero-touch enrollment
- Samsung KNOX / Apple DEP / Google EMM
- Enroll with Email/QR/Link
